

Aulenti

It's all in the details

The Aulenti collection is crafted with premium materials and exceptional attention to detail. The product line includes desks, storage and conference tables.

Hard-working details

Desks feature built-in USB port, soft-close drawer available in wood-grain or gray metal interior finish, and built-in outlets that can be covered by a wood panel when not in use.

Unique design + sustainable finish

Cable-stayed design - a technique typically used in bridge building - forms a strong foundation. Surfaces are coated with a double-component waterborne finish that reduces formaldehyde off-gassing.

Smart power supply

Outlets are easily accessible in the center of the table, or they can be hidden beneath a solid wood cover when not in use.
