

Chessy

The Chessy stool's unconventional shape catches the eye, while the weighted base rocks, keeping you active as you sit.

Fun at work

With its weighted design and skid-proof rubber base, Chessy is a safe, stable alternative to a traditional side chair or exercise ball.

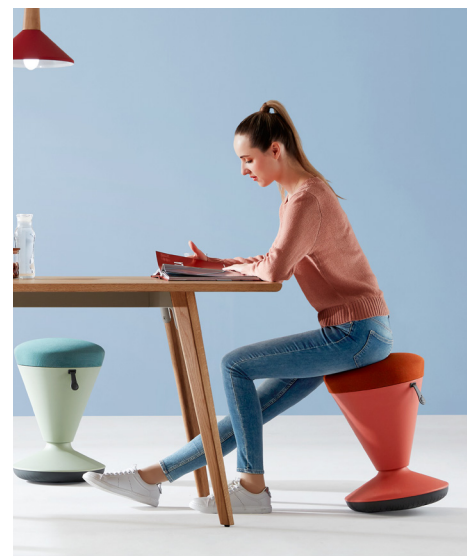

Move with ease

Chessy adjusts in height from 20 to 30 inches and weighs just 29 lbs, so it's easy to move.

Made to last

The seat is made from high-density molded foam, so it's resilient and comfortable.

Stable and skid-proof

The base is weighted and covered in rubber, so it stays in place as you move.
