08 Frequently asked questions

Frequently asked questions, note

1. How to deal with the QR code appearing on the screen?

Answer: The QR code is used by the administrator to distribute the network to desk. When the QR code appears, you can click any button, and the operation can be carried out after the screen display returns to the height interface.

2. How to deal with error alarm?

Answer: Please refer to the "Resetting Function" page, reset the manual controller to solve the error alarm.

3. How to relieve the sedentary state after a sedentary reminder?

Answer: Please raise the desktop to the standing position range for standing working or leave the desk for more than 1 min, the sedentary state will be relieved. (If the desktop height is less than the middle value of the set standing and sitting height, it is determined as the sitting position range; If the desktop height is greater than or equal to the middle value of the set standing and sitting height, it is determined as the standing position range. It will automatically re time, after you are in the sitting mode.)

4. How does the manual controller decide to re time?

Answer: It decides to re time by the human infrared sensor. When the user is within the effective range of the sensor, the manual controller will re time within 10s. When the user leaves the effective range of the sensor for more than 1min, the timing will be reset. (In some cases, the timing will be still on after 1 min, it is due to the difference of human body and ambient temperature.)

5. Can user turn off the sedentary reminder function?

Answer: Yes. Please set the sedentary reminder to “OFF” in setting surface. Then it will not time and remind in sitting mode. (If you only need time but not remind in sitting mode. Please set the sedentary reminder to “ON” and turn off the reminder type).

6. Why did the manual controller remind once again?

Answer: After the reminder is triggered, if the sedentary state is not relived within 5 min, the manual controller will remind once again. After that no reminder.

7. Can the digital display area be operated directly?

Answer: NO, user needs to press buttons to operate the manual controller.

8. Can the sensitivity of the retreating upon obstacle be adjusted?

Answer: Yes. Adjusting method: Under the reset condition (the screen shows “RESET”), press the UP button to adjust the sensitivity. 001 represents the highest sensitivity, 003 represents the lowest sensitivity.

9. How to deal with the abnormal problems like, the manual controller has no reaction or the user has left the desk, but the sedentary reminder is still working?

Answer: Please power off the desk and restart.

Note: When resetting, it is necessary to remove objects such as the sliding cabinet under the desktop before operation.
